

## ***On the COVID-19 Frontline Across Sub-Saharan Africa***

Ciheb's teams in eight African nations have been supporting a wide array of COVID-19 response efforts, from strengthening diagnostic lab capacity and enhancing surveillance capabilities to procuring needed personal protective equipment. They are also ensuring that HIV patients continue to receive continuity of care during this challenging time.

### ***Advanced Clinical Decision Support for Pediatric HIV Care***

The Ciheb Zambia team has developed a clinical decision support system called DelphiCare to support pediatric HIV care. Running off-line on a hand-held Android tablet, DelphiCare enables users to provide longitudinal, expert-level management of HIV-exposed infants and HIV-infected children.
